

INFO ABOUT THE REQUIREMENTS OF THE SOLUTION FROM THE PARTNER

Hi,

First of all, thank you for accepting our invitation. We are proud of having you in our group of possible partners for our challenge.

Before we talk about specified points, we want to know some aspects about your entity and the experience and knowledge you have about the area of this project and also, some more values.

Here you have a list with some questions that we think that are important to answer for choosing you as a partner and also to be able to evaluate your solution later.

Info about your entity:

1. First, give us a brief description about your entity. (Type of entity, experience, localization, company culture...)
2. In general, do you have any knowledge about the area of the project?
3. If you have knowledge about the area, have you ever participated in a project of this area? If the answer is yes, talk about the project or projects, and a summary of what you have done.
4. Do you have participated in an international and open project? Talk about your experience if you have participated.

Info about your solution:

1. Talk us about your solution to the challenge proposed.
2. How much time will be the realization of the solution?
3. How much money do you will need to develop the solution?
4. What things do you need from us as your partner to achieve the solution?

If you have any extra information that you think that is important and relevant for the solution and the project, please write it in this document so we can evaluate all your ideas.

Thank you,

Regards.
